

1800 Census of Cabarrus County, NC - Salisbury District

Notes about this transcription: Ancestry.com says pages 676/678-682/682 are in a "not stated" township; however, the actual microfilm shows all of Cabarrus County enumerated within Salisbury District, the pages in ancestry were just out of order - all pages have a typed & written page number, pages are given as: [typed] / [written] - spelling of names is how they appear in enumeration as close as I've been able to ascertain, I have question marks by surnames (and in some cases numbers) that were blurred or questionable - some rows under the column for slaves have 2 numbers or 1 large number under the 1st entry on the page. I do not know what this number represents, but based on the county and page totals, the large number is not the number of slaves in that household. I have typed this unknown number in a slightly smaller font to distinguish it from the number of slaves on that farm as this number may be of importance to those doing research regarding slaves - AOFP=All Other Free Persons - some of the totals at the end or beginning of a page were unreadable but were able to be determined either by the totals on the first line of the next page or by counting the difference between the last totals given and the new totals. These unreadable totals have been placed in brackets - at the end of the census, the county totals list 2 AOFP, however, none were enumerated in the census. This may have been a mistake by the enumerator or by the census bureau or the "2" may be there to represent something else we don't know.

Page	Name	Free White Males					Free White Females					AOFP	Slaves
